Thank you for your interest in the non-penetrating Magnemount (Patent Pending) mounting system. The Magnemount is a cost effective system that uses magnets to achieve the holding power and a unique design that allows its use on curved steel surfaces, such as water towers.

The Magnemount currently is available in 3 basic designs. All of the designs can be modified to fit your specialized needs.

Model MB

- 100 MPH wind speed capacity – 2.5 ft² wind surface area
- Mast fixed/adjustable - fixed
- Footprint – 2 feet x 2 feet
- Mast - 2" or 3"OD x .375" wall x 48" long
- Guyed or unguyed - unguyed
